

### Space in Health Anxiety from Depression & Anxiety

This programme has been designed and tailored for individuals living with Health Anxiety who are experiencing co-morbid symptoms of depression or anxiety. It aims to relieve these symptoms of depression and anxiety by:

- Focusing on developing more flexible ways of thinking, not only in relation to the individual's condition but in other aspects of their life
- Increasing awareness and understanding of emotions in the context of living with Health Anxiety
- Increasing activity and motivation in daily life, in the context of physical limitations that can occur when living with Health Anxiety.

The programme is accessible 24/7, allowing users to access the programme at a time and place that suits them.

In order to promote engagement, the content and activities have been tailored to be sensitive to those living with social/health anxiety.

All vignettes, personal stories and examples used throughout the programme are from the perspective of an individual living with Health Anxiety. The user is also provided with a number of activities to enable them to become more aware of their mood and to understand their situation.

The psycho-educational content has been tailored to the specific thoughts and behaviours which can keep Healthy Anxiety going.

#### Space from <u>Health Anxiety</u> –please see patient information about the SilverCloud modules here.
