

## Drugs associated with Abnormal LFTs

This list is not exhaustive and there may be a mixed pattern of abnormal LFTs. Please see the BNF for further information.

<b>Cholestatic pattern (ALP/GGT)</b>	<b>Cytotoxic pattern ( ALT)</b>
Co-amoxiclav	Allopurinol
Anabolic steroids	Amiodarone
Chlorambucil	Aspirin
Chlorpromazine	zathioprine/6-Mercaptopurine
Chlorpropamide	Carbamazepine
Clopidogrel	Etretinate
Colchicine	HAART drugs
Erythromycin	Hydralazine
Estrogen (oral contraceptives)	Isoniazid
Flucloxacillin	NSAIDs
Mirtazapine	Ketoconazole/Fluconazole
Phenobarbital	Lisinopril
Terbinafine	Methotrexate
6-Mercaptopurine	Methyldopa
Nitrofurantoin	Nicotinic acid (especiallyS/R)

Omeprazole

Paracetamol

Paroxetine

Phenytoin

Propylthiouracil

Rifampin

Risperidone

“Statins”

Sertraline

Sulfonamides

Tetracyclines

Tricyclics

Trimethoprim

Trazodone

Valproate
