

Ophthalmology – Acute referral clinic (ARC)

The Acute referral clinic sees patients by appointment only. Patients are referred and an appropriate appointment is booked or advice given over the phone. The clinic does not have the capacity to accept “walk-ins”

This clinic is situated on the ground floor of the eye Pavilion and deals specifically with emergency referrals. Patients are first assessed by one of our nurses and have their vision and pupils assessed and intraocular pressure measured. They may also have dilating drops put in if retinal assessment is required. Following this patients then have an appointment with a specialist nurse practitioner or doctor.

For an appointment in this clinic please see [how to refer a patient](#)
